Year Five pupils have been working incredibly hard, during these very difficult times. It has been lovely to see some of the fantastic work they are producing at home. They have been busy solving Maths equations, reading a variety of texts, writing about a range of different pictures, taking part in Science experiments, recapping their knowledge of the Anglo Saxons and so much more! They have been very creative and have shared some of their work with you below! (3)

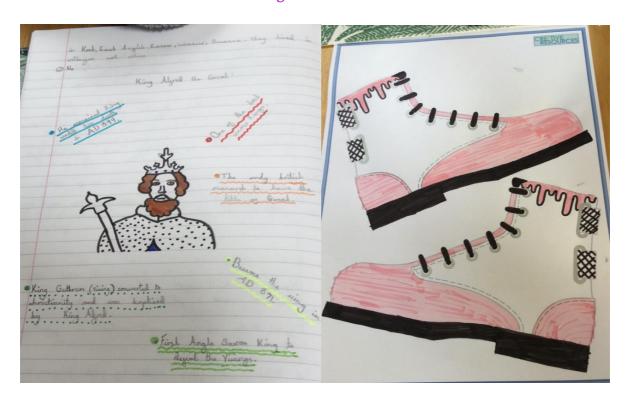

Aaron West, in 5RB, has been working extremely hard on a range of different Mathematical equations. Here is one example of his amazing work!

Anthony Cunningham, in 5RB, produced this lovely piece of writing, after looking at the picture, 'Controlling the Weather'.

Emilia Day, in 5RB, has worked incredibly hard to produce some beautiful pieces of work: just look at the detail and effort she has put into this piece on King Alfred the Great and those fabulous boots she designed for PSHE!

Madison Smith, in 5RB, has turned her hand to a bit of baking, and, as a result, produced some delicious looking cupcakes! Madison also experimented in her Creative Time with water in glasses, to make different sounds!

Millie Wheeler, in 5RB, has been working incredibly hard on her Mathematical knowledge and it is really paying off! Just look at the amount of work she is producing!
